

WILD GAME PROCESSOR FIELD GUIDE

# THE MODERN WILD GAME PROCESSOR PLAYBOOK

How top processors eliminate chaos, increase capacity, and run profitable seasons.

Freezer pressure

Visible

Less guessing. Fewer calls. Cleaner handoffs.

01

# Most Processors Don't Have a Processing Problem... They Have a System Problem

- Freezers fill up → forced shutdowns
- Phones ringing nonstop
- Hunters frustrated and calling repeatedly
- Staff overwhelmed during peak days
- Guesswork ordering supplies

## VISIBILITY WINS

**The difference between a stressful season and a profitable one is visibility.**

# The Top 20% Operate Differently

1

## Controlled Intake

Digital check-in keeps every animal, hunter, and order detail clean from the start.

- Digital check-in
- No handwritten confusion

2

## Workflow Visibility

Teams move faster when they know exactly where each animal sits in the process.

- Know exactly where every animal is

3

## Automated Communication

Customers stay informed without pulling staff back to the phone.

- Hunters get notified automatically

4

## Capacity Awareness

Freezer pressure becomes a managed signal instead of a season-ending surprise.

- No surprise shutdowns

# What Inefficiency Actually Costs You

- Lost revenue from turning customers away
- Time wasted on phone calls
- Missed pickups → clogged freezers
- Burnout
- Stress

## POWER LINE

**Most processors lose more money from inefficiency than they spend fixing it.**

04

# What Modern Processors Are Using

01 Digital Intake System

02 Workflow Tracking

03 Automated Messaging

04 Performance Metrics

Platforms like My Game Processor bring all of this into one system.

# Real Results

## BEFORE

- "We shut down mid-season"
- "Phones never stopped ringing"
- "Pick-ups were slow"

## AFTER

- "We stayed open the entire season"
- "Phone calls dropped significantly"
- "Pickups got faster"

06

# The Season Is Won Before It Starts

- Order supplies based on real data
- Plan staffing with confidence
- Understand demand trends

**Data**

**Staffing**

**Capacity**

07

# Want to See Where You Stand?

Take the Processor Scorecard and see how your operation compares to modern processors.
